

## **Taste Labs, Inc.**

# **ANNUAL REPORT**

833 Broadway, 2 Floor  
New York, NY 10003  
(206) 992-2144  
<https://www.taste.io/>

This Annual Report is dated April 23, 2026.

## **BUSINESS**

### Overview:

Taste Labs delivers personalized reviews, recommendations, discovery, and productivity tools across various categories. The business owns six platforms, two for digital media (Taste App and Matched App) and four for shopping (Autumn App, Kedenza, Opimoda, and House for Greens). Taste Labs also holds a minority stake in two platforms in collaboration with The Shopping Lab (Grocery Buddy and Basket Savings).

On each platform, Taste helps users rate items and record preferences (movies, shows, clothes, home decor) to establish their taste profile. Based on this input, our technology returns individualized recommendations, user experiences, and productivity offerings by correlating the preferences of millions of users, connecting those with the most similar tastes.

On some of the platforms, a subscription model allows users to unlock additional recommendations and features by upgrading to a paid membership. The Company also generates revenue through affiliate marketing and offering its technology, algorithm, and services to other businesses.

The same core technology is used to assist shoppers with product discovery in retail and groceries with affiliate marketing and data insights business models.

### Product Highlights:

**Registered Users:** The platforms have surpassed 1.46 million registered users in aggregate, representing continued year-over-year growth in the registered user base.

**Engagement:** Across three of the Company's primary platforms — Taste App, Autumn App, and Matched App — the Company reports approximately 74,000, 32,000, and 20,000 monthly active users, respectively. Monthly active user counts have remained approximately flat year-over-year as the platforms have matured, with new user acquisition generally offsetting churn.

**Operating Results:** In 2025, the Company operated close to break-even, reporting net income of approximately \$30,615 compared to a net loss of approximately \$69,066 in 2024.

**Revenue Mix:** Total revenue was \$362,455 in 2025 compared to \$303,175 in 2024, driven primarily by strategic B2B partnership activity. Affiliate and subscription revenue from the Company's consumer platforms remained modest in 2025.

**Competitive Advantages:**

**Humanistic AI:** Our algorithm connects people with similar preferences, creating a natural and intuitive discovery experience.

**Cross-Category Intelligence:** A unified backend supports all categories, enabling cost-efficient expansion and creating a defensible data moat.

**Privacy by Design ("Not Creepy"):** We incentivize users to provide feedback through ratings and saves — not passive surveillance — ensuring sponsored content remains relevant without compromising privacy.

**Business Model:**

**Freemium:** Users unlock advanced filters and features for \$2.99/month or \$19.99/year.

**Affiliate Commissions:** Revenue share ranges from 3–10% in digital media and 8–15% in retail.

**B2B Services & Data Intelligence:** Taste Labs sells its recommendation technology and anonymized user preference data to businesses for use in UX personalization, market research, and audience targeting.

**Future Roadmap:**

The consumer discovery landscape is shifting. Streaming and media continue to consolidate, and AI-based recommendation tools are changing how people find what to watch, buy, and do. Against that backdrop, Taste Labs is focusing where it has a real edge: a first-party, opted-in dataset of user preferences built over years of direct engagement.

We believe consented preference data will only become more valuable as retailers, advertisers, and brands look for alternatives to inferred third-party signals. Our existing partnerships in retail and CPG are the proving ground for turning that thesis into commercial product.

Over the next 12–24 months, we plan to:

Deepen our retail and consumer-data partnerships, and pursue new ones where they fit the thesis

Run our consumer platforms steadily while we see how the AI-driven shifts play out

Bring our preference-data product to enterprise customers in retail, CPG, and adjacent sectors

Everything ties back to one idea: helping people and businesses save time, money, and make better decisions through preference-driven recommendations.

### **Previous Offerings**

Type of security sold: Convertible Note

Final amount sold: \$758,174.00

Use of proceeds: Product development & marketing

Date: July 24, 2019

Offering exemption relied upon: Regulation CF

Name: Common Stock

Type of security sold: Equity

Final amount sold: \$365,624.33

Number of Securities Sold: 572,147

Use of proceeds: Research development, marketing, and operations

Date: April 14, 2021

Offering exemption relied upon: Regulation CF

Name: Common Stock

Type of security sold: Equity

Final amount sold: \$143,673.99

Number of Securities Sold: 149,732

Use of proceeds: Research development, marketing, and operations

Date: Nov 3, 2023

Offering exemption relied upon: Regulation CF

## **REGULATORY INFORMATION**

The company has not previously failed to comply with the requirements of Regulation Crowdfunding;

## **MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION**

### **Operating Results – 2025 Compared to 2024**

Revenue:

Revenue increased approximately 19.6% between 2024 and 2025, from \$303,175 to \$362,455. Revenue in 2025 was primarily driven by strategic B2B partnership activity in the retail/consumer-data sector, under

arrangements structured principally around joint product development and preference-data work. Affiliate and subscription revenue from the Company's consumer platforms remained modest in 2025.

The Company operated close to break-even in 2025, reporting net income of \$30,615. Management does not currently expect material revenue growth from the existing consumer platforms, and is focused instead on translating the Company's first-party preference-data assets into durable B2B revenue streams. Management expects long-term revenue to be driven by preference-data and enterprise partnerships, which remain at an early stage.

The Company does not expect material revenue acceleration until:

- Strategic partnership activity moves beyond product-development work into scalable commercial arrangements with end customers.
- Preference-data products mature from pilot stage toward repeatable enterprise commercial product.
- The Company identifies and commits to a differentiated product direction in light of the ongoing AI-driven changes to the discovery landscape.

Marketing Expenses:

Marketing & advertising expenses decreased further to \$1,870 in 2025 from \$6,199 in 2024, as the Company continued to prioritize product and technology investment over paid customer acquisition.

General & Administrative Expenses:

Total operating expenses for 2025 were \$331,840, essentially flat compared to \$326,751 in 2024. Research spending decreased to \$41,965 in 2025 from \$67,740 in 2024 as certain R&D stages concluded.

Historical Results & Cash Flows:

The Company operated close to break-even in 2025, reporting net income of approximately \$30,615 compared to a net loss of \$69,066 in 2024. Cash generated from operations was sufficient to fund the Company's activities without the need for outside financing during the year. Engineering and technology development, largely executed by contractors, continue to be the Company's largest category of operating spend.

2026 Outlook:

Continue existing strategic B2B partnership activity in the retail/consumer-data sector, and selectively explore additional partnerships.

Operate consumer platforms in a steady state without significant new feature investment, while evaluating new product directions in light of AI-driven changes to consumer discovery.

Progress commercialization of the Company's preference-data product with enterprise customers.

## **Liquidity and Capital Resources**

At December 31, 2025, the Company had cash of 45,699.

## Debt

Creditor: Seedinvest Convertible Note

Amount Owed: \$758,174.00

Interest Rate: 6.0%

Maturity Date: June 14, 2021

Discount Rate: 20.0%

Valuation Cap: \$3,000,000.00

Conversion Trigger: \$1,000,000 preferred stock round

Material Rights Conversion of the Crowd Note. a. Qualified Equity Financing. Upon the occurrence of a Qualified Equity Financing the Crowd Note shall convert automatically, without any further action on the part of either the Company or the Investor, whereupon the Crowd Note shall be deemed canceled, into the number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price prior to the closing of the Qualified Equity Financing. b. Corporate Transaction. In the event of a Corporate Transaction prior to a Qualified Equity Financing, the Company shall notify the Investor in writing of the terms of the Corporate Transaction and the Investor shall receive the higher value received by either: i. Obtaining that number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price; or ii. Obtaining the Corporate Transaction Payment. c. At or After Maturity. Commencing on the Maturity Date, the Crowd Note holders (by a decision of those Crowd Note holders holding a majority of the principal amount of the outstanding Crowd Notes) have the option to (a) require the Company to pay the Outstanding Loan Balances or (b) convert the Crowd Notes into a number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price. Upon the conversion of this Note into Conversion Shares, in lieu of any fractional shares to which the Holder would otherwise be entitled, the Company must pay the Holder cash equal to such fraction multiplied by such price per share. Mechanics of Conversion. As promptly as practicable after the conversion of this Crowd Note, the Company at its expense will issue and deliver to the Investor, upon surrender of this Crowd Note, the respective number of Conversion Shares. e. Note Completion. This Crowd Note will terminate upon the earlier of: (a) a conversion of the entire Purchase Price under this Crowd Note into Conversion Shares; or (b) the payment of amounts due to the Investor pursuant to Section 4(b)(ii). Common Stock The amount of security authorized is 10,000,000 with a total of 7,770,581 outstanding. Voting Rights 1 vote per share Material Rights The total amount outstanding (7,770,581) includes 762,311 shares to be issued pursuant to reserved but unissued stock options, and 446,513 shares to be issued pursuant to outstanding stock options. What it means to be a minority holder As a minority holder you will have limited ability, if at all, to influence our policies or any other corporate matter, including the election of directors, changes to our company's governance documents, additional issuances of securities, company repurchases of securities, a sale of the company or of assets of the company or transactions with related parties. Dilution Investors should understand the potential for dilution. The investor's stake in a company could be diluted due to the company issuing additional shares. In other words, when the company issues more shares, the percentage of the company that you own will decrease,

even though the value of the company may increase. You will own a smaller piece of a larger company. This increase in number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible notes, preferred shares or warrants) into stock. If we decide to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if we offer dividends, and most early stage companies are unlikely to offer dividends, preferring to invest any earnings into the company). The type of dilution that hurts early-stage investors most occurs when the company sells more shares in a "down round," meaning at a lower valuation than in earlier offerings. If you are making an investment expecting to own a certain percentage of the company or expecting each share to hold a certain amount of value, it's important to realize how the value of those shares can decrease by actions taken by the company. Dilution can make drastic changes to the value of each share, ownership percentage, voting control, and earnings per share.

Creditor: John Lin (Founder)

Amount Owed: \$84.00

Interest Rate: 0.0%

Maturity Date: N/A

\$84 in short-term loans for which no interest is charged and has no fixed maturity date.

## **DIRECTORS, EXECUTIVE OFFICERS AND SIGNIFICANT EMPLOYEES**

Our directors and executive officers as of the date hereof, are as follows:

Name: John Lin

John Lin's current primary role is with the Issuer.

Positions and offices currently held with the issuer:

Position: Principle Accounting Officer

Dates of Service: January 2018 — Present

Responsibilities: Overseeing and managing the financial accounting and reporting functions for Taste Labs.

Position: CEO

Dates of Service: January 2018 — Present

Responsibilities: Oversees general operations. Founder shares, no additional equity compensation, \$7K monthly salary.

Position: Director

Dates of Service: January 2018 — Present

Responsibilities: Managing the overall business and affairs of the company

Name: Justin Messina

Justin Messina's current primary role is with the Issuer.

Positions and offices currently held with the issuer:

Position: CTO

Dates of Service: January 2018 — Present

Responsibilities: Oversees all technical aspects of the company. Founder shares, no additional equity compensation, \$7K monthly salary.

### **PRINCIPAL SECURITY HOLDERS**

Set forth below is information regarding the beneficial ownership of our Common Stock, our only outstanding class of capital stock, as of December 31, 2025, by (i) each person whom we know owned, beneficially, more than 10% of the outstanding shares of our Common Stock, and (ii) all of the current officers and directors as a group. We believe that, except as noted below, each named beneficial owner has sole voting and investment power with respect to the shares listed. Unless otherwise indicated herein, beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and includes voting or investment power with respect to shares beneficially owned.

Title of class: Common Stock

Stockholder Name: John Lin

Amount and nature of Beneficial ownership: 3,000,000

Percent of class: 38.85

Title of class: Common Stock

Stockholder Name: Justin Messina

Amount and nature of Beneficial ownership: 3,000,000

Percent of class: 38.85

### **RELATED PARTY TRANSACTIONS**

Name of Person: John Lin

Relationship to Company: Officer, Director, Principal Shareholder

Nature / amount of interest in the transaction: In 2020, the Company received a cash advance from its shareholder, John Lin, in the amount of \$5,966. As of December 31, 2025, and December 31, 2021, the outstanding balance of this advance is \$84.

Material Terms: No interest on the loan and no maturity date.

## OUR SECURITIES

### Seedinvest Convertible Note

The security will convert into Common stock and the terms of the Seedinvest Convertible Note are outlined below:

Amount outstanding: \$758,174.00

Maturity Date: June 14, 2021

Interest Rate: 6.0%

Discount Rate: 20.0%

Valuation Cap: \$3,000,000.00

Conversion Trigger: \$1,000,000 preferred stock round

### Material Rights

#### Conversion of the Crowd Note.

- a. Qualified Equity Financing. Upon the occurrence of a Qualified Equity Financing the Crowd Note shall convert automatically, without any further action on the part of either the Company or the Investor, whereupon the Crowd Note shall be deemed canceled, into the number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price prior to the closing of the Qualified Equity Financing.
- b. Corporate Transaction. In the event of a Corporate Transaction prior to a Qualified Equity Financing, the Company shall notify the Investor in writing of the terms of the Corporate Transaction and the Investor shall receive the higher value received by either:
  - i. Obtaining that number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price; or
  - ii. Obtaining the Corporate Transaction Payment.
- c. At or After Maturity. Commencing on the Maturity Date, the Crowd Note holders (by a decision of those Crowd Note holders holding a majority of the principal amount of the outstanding Crowd Notes) have the option to (a) require the Company to pay the Outstanding Loan Balances or (b) convert the Crowd Notes into a number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price. Upon the conversion of this Note into Conversion Shares, in lieu of any fractional shares to which the Holder would otherwise be entitled, the Company must pay the Holder cash equal to such fraction multiplied by such price per share.
- d. Mechanics of Conversion. As promptly as practicable after the conversion of this Crowd Note, the Company at its expense will issue and deliver to the Investor, upon surrender of this Crowd Note, the respective number of Conversion Shares.
- e. Note Completion. This Crowd Note will terminate upon the earlier of: (a) a conversion of the entire Purchase Price under this Crowd Note into Conversion Shares; or (b) the payment of amounts due to the Investor pursuant to Section 4(b)(ii).

## Common Stock

The amount of security authorized is 10,000,000 with a total of 7,721,879 outstanding.

## Voting Rights

One vote per share. Please see voting rights of securities sold in this offering below.

## Material Rights

The total amount outstanding (7,721,879) includes 224,356 shares to be issued pursuant to stock options, reserved but unissued.

The total amount outstanding also includes 775,644 shares to be issued pursuant to stock options issued.

## **What it means to be a minority holder**

As a minority holder of Common Stock of this offering, you have granted your votes by proxy to the CEO of the Company. Even if you were to receive control of your voting rights, as a minority holder, you will have limited rights in regards to the corporate actions of the Company, including additional issuances of securities, company repurchases of securities, a sale of the Company or its significant assets, or company transactions with related parties. Further, investors in this offering may have rights less than those of other investors and will have limited influence on the corporate actions of the Company.

## **Dilution**

Investors should understand the potential for dilution. The investor's stake in a company could be diluted due to the company issuing additional shares. In other words, when the company issues more shares, the percentage of the company that you own will go down, even though the value of the company may go up. You will own a smaller piece of a larger company. This increase in the number of shares outstanding could result from a stock offering (such as an initial public offering, another crowdfunding round, a venture capital round, or angel investment), employees exercising stock options, or by conversion of certain instruments (e.g. convertible bonds, preferred shares or warrants) into stock.

If the company decides to issue more shares, an investor could experience value dilution, with each share being worth less than before, and control dilution, with the total percentage an investor owns being less than before. There may also be earnings dilution, with a reduction in the amount earned per share (though this typically occurs only if the company offers dividends, and most early-stage companies are unlikely to offer dividends, preferring to invest any earnings into the company).

## **RISK FACTORS**

### Uncertain Risk

An investment in the Company (also referred to as "we", "us", "our", or "Company") involves a high degree of risk and should only be considered by those who can afford the loss of their entire investment. Furthermore, the purchase of any of the Common Stock should only be undertaken by persons whose financial resources are

sufficient to enable them to indefinitely retain an illiquid investment. Each investor in the Company should consider all of the information provided to such potential investor regarding the Company as well as the following risk factors, in addition to the other information listed in the Company's Form C. The following risk factors are not intended, and shall not be deemed to be, a complete description of the commercial and other risks inherent in the investment in the Company.

**Our business projections are only projections**

There can be no assurance that the Company will meet our projections. There can be no assurance that the Company will be able to find sufficient demand for our product, that people think it's a better option than a competing product, or that we will be able to provide the service at a level that allows the Company to make a profit and still attract business.

**Any valuation at this stage is difficult to assess**

The valuation for the offering was established by the Company. Unlike listed companies that are valued publicly through market-driven stock prices, the valuation of private companies, especially startups, is difficult to assess and you may risk overpaying for your investment.

**The transferability of the Securities you are buying is limited**

Any Common Stock purchased through this crowdfunding campaign is subject to SEC limitations of transfer. This means that the stock/note that you purchase cannot be resold for a period of one year. The exception to this rule is if you are transferring the stock back to the Company, to an "accredited investor," as part of an offering registered with the Commission, to a member of your family, a trust created for the benefit of your family, or in connection with your death or divorce.

**Your investment could be illiquid for a long time**

You should be prepared to hold this investment for several years or longer. For the 12 months following your investment, there will be restrictions on how you can resell the securities you receive. More importantly, there is no established market for these securities and there may never be one. As a result, if you decide to sell these securities in the future, you may not be able to find a buyer. The Company may be acquired by an existing player in the educational software development industry. However, that may never happen or it may happen at a price that results in you losing money on this investment.

**If the Company cannot raise sufficient funds it will not succeed**

The Company is offering Common Stock in the amount of up to \$534,998.16 in this offering and may close on any investments that are made. Even if the maximum amount is raised, the Company is likely to need additional funds in the future in order to grow, and if it cannot raise those funds for whatever reason, including reasons relating to the Company itself or the broader economy, it may not survive. If the Company manages to raise only the minimum amount of funds, sought, it will have to find other sources of funding for some of the plans outlined in "Use of Proceeds."

We may not have enough capital as needed and may be required to raise more capital.

We anticipate needing access to credit in order to support our working capital requirements as we grow.

Although interest rates are low, it is still a difficult environment for obtaining credit on favorable terms. If we cannot obtain credit when we need it, we could be forced to raise additional equity capital, modify our growth plans, or take some other action. Issuing more equity may require bringing on additional investors. Securing these additional investors could require pricing our equity below its current price. If so, your investment could lose value as a result of this additional dilution. In addition, even if the equity is not priced lower, your ownership percentage would be decreased with the addition of more investors. If we are unable to find additional investors willing to provide capital, then it is possible that we will choose to cease our sales activity. In that case, the only asset remaining to generate a return on your investment could be our intellectual property. Even if we are not forced to cease our sales activity, the unavailability of credit could result in the Company performing below expectations, which could adversely impact the value of your investment.

Terms of subsequent financings may adversely impact your investment

We will likely need to engage in common equity, debt, or preferred stock financings in the future, which may reduce the value of your investment in the Common Stock. Interest on debt securities could increase costs and negatively impact operating results. Preferred stock could be issued in series from time to time with such designation, rights, preferences, and limitations as needed to raise capital. The terms of preferred stock could be more advantageous to those investors than to the holders of Common Stock. In addition, if we need to raise more equity capital from the sale of Common Stock, institutional or other investors may negotiate terms that are likely to be more favorable than the terms of your investment, and possibly a lower purchase price per share.

Management Discretion as to Use of Proceeds

Our success will be substantially dependent upon the discretion and judgment of our management team with respect to the application and allocation of the proceeds of this Offering. The use of proceeds described below is an estimate based on our current business plan. We, however, may find it necessary or advisable to re-allocate portions of the net proceeds reserved for one category to another, and we will have broad discretion in doing so.

Projections: Forward Looking Information

Any projections or forward-looking statements regarding our anticipated financial or operational performance are hypothetical and are based on management's best estimate of the probable results of our operations and will not have been reviewed by our independent accountants. These projections will be based on assumptions that management believes are reasonable. Some assumptions invariably will not materialize due to unanticipated events and circumstances beyond management's control. Therefore, actual results of operations will vary from such projections, and such variances may be material. Any projected results cannot be guaranteed.

The amount raised in this offering may include investments from company insiders or immediate family members

Officers, directors, executives, and existing owners with a controlling stake in the company (or their immediate family members) may make investments in this offering. Any such investments will be included in the raised amount reflected on the campaign page.

**We are reliant on one main type of service**

All of our current services are variants of one type of service and/or product. Relying heavily on a single service or product can be risky, as changes in market conditions, technological advances, shifts in consumer preferences, or otherwise can adversely impact the demand for the product or service, potentially leading to revenue declines or even business failure.

**Some of our products are still in prototype phase and might never be operational products**

It is possible that there may never be an operational product or that the product may never be used to engage in transactions. It is possible that the failure to release the product is the result of a change in business model upon the Company's making a determination that the business model, or some other factor, will not be in the best interest of the Company and its stockholders.

**Developing new products and technologies entails significant risks and uncertainties**

We are currently in the research and development stage and have only manufactured a prototype for our entertainment and product recommendation platforms and B2B data platforms. Delays or cost overruns in the development of our entertainment and product recommendation platforms and B2B data platforms and failure of the product to meet our performance estimates may be caused by, among other things, unanticipated technological hurdles, difficulties in manufacturing, changes to design, and regulatory hurdles. Any of these events could materially and adversely affect our operating performance and results of operations.

**Minority Holder; Securities with Voting Rights**

The Common Stock that an investor is buying has voting rights attached to them. However, you will be part of the minority shareholders of the Company and have agreed to appoint the Chief Executive Officer of the Company (the "CEO"), or his or her successor, as your voting proxy. You are trusting in management discretion in making good business decisions that will grow your investments. Furthermore, in the event of a liquidation of our Company, you will only be paid out if there is any cash remaining after all of the creditors of our Company have been paid out.

**You are trusting that management will make the best decision for the company**

You are trusting in management discretion. You are buying securities as a minority holder and therefore must trust the management of the Company to make good business decisions that grow your investment.

**Insufficient Funds**

The Company might not sell enough securities in this offering to meet its operating needs and fulfill its plans, in which case it will cease operating and you will get nothing. Even if we sell all the Common Stock we are offering now, the Company will (possibly) need to raise more funds in the future, and if it can't get them, we

will fail. Even if we do make a successful offering in the future, the terms of that offering might result in your investment in the Company being worth less, because later investors might get better terms.

This offering involves “rolling closings,” which may mean that earlier investors may not have the benefit of information that later investors have.

Once we meet our target amount for this offering, we may request that StartEngine instruct the escrow agent to disburse offering funds to us. At that point, investors whose subscription agreements have been accepted will become our investors. All early-stage companies are subject to a number of risks and uncertainties, and it is not uncommon for material changes to be made to the offering terms, or to companies’ businesses, plans, or prospects, sometimes on short notice. When such changes happen during the course of an offering, we must file an amendment to our Form C with the SEC, and investors whose subscriptions have not yet been accepted will have the right to withdraw their subscriptions and get their money back. Investors whose subscriptions have already been accepted, however, will already be our investors and will have no such right.

Our new product could fail to achieve the sales projections we expected

Our growth projections are based on an assumption that with an increased advertising and marketing budget our products will be able to gain traction in the marketplace at a faster rate than our current products have. It is possible that our new products will fail to gain market acceptance for any number of reasons. If the new products fail to achieve significant sales and acceptance in the marketplace, this could materially and adversely impact the value of your investment.

We face significant market competition

We will compete with larger, established companies that currently have products on the market and/or various respective product development programs. They may have much better financial means and marketing/sales and human resources than us. They may succeed in developing and marketing competing equivalent products earlier than us, or superior products than those developed by us. There can be no assurance that competitors will render our technology or products obsolete or that the products developed by us will be preferred to any existing or newly developed technologies. It should further be assumed that competition will intensify.

We are competing against other recreational activities

Although we are a unique company that caters to a select market, we do compete against other recreational activities. Our business growth depends on the market interest in the Company over other activities.

We are an early stage company and have limited revenue and operating history

The Company has a short history, few customers, and effectively no revenue. If you are investing in this company, it’s because you think that Taste’s entertainment platform and recommendation engine is a good idea, that the team will be able to successfully market, and sell the product or service, and that we can price them right and sell them to enough peoples so that the Company will succeed. Further, we have never turned a profit and there is no assurance that we will ever be profitable.

Our trademarks, copyrights and other intellectual property could be unenforceable or ineffective. Intellectual property is a complex field of law in which few things are certain. It is possible that competitors will be able to design around our intellectual property, find prior art to invalidate it, or render the patents unenforceable through some other mechanism. If competitors are able to bypass our trademark and copyright protection without obtaining a sublicense, it is likely that the Company's value will be materially and adversely impacted. This could also impair the Company's ability to compete in the marketplace. Moreover, if our trademarks and copyrights are deemed unenforceable, the Company will almost certainly lose any potential revenue it might be able to raise by entering into sublicenses. This would cut off a significant potential revenue stream for the Company.

The cost of enforcing our trademarks and copyrights could prevent us from enforcing them. Trademark and copyright litigation has become extremely expensive. Even if we believe that a competitor is infringing on one or more of our trademarks or copyrights, we might choose not to file suit because we lack the cash to successfully prosecute a multi-year litigation with an uncertain outcome; or because we believe that the cost of enforcing our trademark(s) or copyright(s) outweighs the value of winning the suit in light of the risks and consequences of losing it; or for some other reason. Choosing not to enforce our trademark(s) or copyright(s) could have adverse consequences for the Company, including undermining the credibility of our intellectual property, reducing our ability to enter into sublicenses, and weakening our attempts to prevent competitors from entering the market. As a result, if we are unable to enforce our trademark(s) or copyright(s) because of the cost of enforcement, your investment in the Company could be significantly and adversely affected.

The loss of one or more of our key personnel, or our failure to attract and retain other highly qualified personnel in the future, could harm our business.

To be successful, the Company requires capable people to run its day-to-day operations. As the Company grows, it will need to attract and hire additional employees in sales, marketing, design, development, operations, finance, legal, human resources, and other areas. Depending on the economic environment and the Company's performance, we may not be able to locate or attract qualified individuals for such positions when we need them. We may also make hiring mistakes, which can be costly in terms of resources spent in recruiting, hiring, and investing in the incorrect individual and in the time delay in locating the right employee fit. If we are unable to attract, hire and retain the right talent or make too many hiring mistakes, it is likely our business will suffer from not having the right employees in the right positions at the right time. This would likely adversely impact the value of your investment.

We rely on third parties to provide services essential to the success of our business.

We rely on third parties to provide a variety of essential business functions for us, including manufacturing, shipping, accounting, legal work, public relations, advertising, retailing, and distribution. It is possible that some of these third parties will fail to perform their services or will perform them in an unacceptable manner. It is possible that we will experience delays, defects, errors, or other problems with their work that will materially impact our operations and we may have little or no recourse to recover damages for these losses. A disruption in

these key or other suppliers' operations could materially and adversely affect our business. As a result, your investment could be adversely impacted by our reliance on third parties and their performance.

The Company is vulnerable to hackers and cyber-attacks

As an internet-based business, we may be vulnerable to hackers who may access the data of our investors and the issuer companies that utilize our platform. Further, any significant disruption in service on Taste Labs, Inc or in its computer systems could reduce the attractiveness of the platform and result in a loss of investors and companies interested in using our platform. Further, we rely on a third-party technology provider to provide some of our backup technology. Any disruptions of services or cyber-attacks either on our technology provider or on Taste Labs, Inc could harm our reputation and materially negatively impact our financial condition and business.

## **RESTRICTIONS ON TRANSFER**

The common stock sold in the Regulation CF offering, may not be transferred by any purchaser, for a period of one-year beginning when the securities were issued, unless such securities are transferred:

- (1) to the Company;
- (2) to an accredited investor;
- (3) as part of an offering registered with the SEC; or
- (4) to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

## **SIGNATURES**

Pursuant to the requirements of Sections 4(a)(6) and 4A of the Securities Act of 1933 and Regulation Crowdfunding (§ 227.100-503), the issuer certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form C and has duly caused this Form to be signed on its behalf by the duly authorized undersigned, on November 10, 2025.

**Taste Labs, Inc**  
**BALANCE SHEET**  
**AS OF Dec 31, 2024**  
**(unaudited)**

## **NOTE 1 – NATURE OF OPERATIONS**

Taste Labs, Inc was formed on January 8, 2018 (“Inception”) in the State of Delaware. The balance sheet of Taste Labs, Inc (which may be referred to as the "Company", "we," "us," or "our") are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The Company’s headquarters are located in New York, NY.

Taste Labs, Inc delivers personalized product reviews and recommendations. The business owns two recommendation platforms, one for digital media (Taste App), another for shopping (Autumn App). On each platform, a user rates items (movies, shows, clothes, home decor) to establish their taste profile. Based on this input, the company's technology returns individualized product recommendations by correlating the preferences of its users, connecting those with the most similar tastes.

A subscription model allows users to unlock additional recommendations and features by upgrading to a paid membership. The company also generates revenue through affiliate marketing.

## **NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

### *Basis of Presentation*

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (“US GAAP”).

### *Use of Estimates*

The preparation of balance sheet in conformity with US GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, and the reported amount of revenues and expenses during the reporting period. Actual results could materially differ from these estimates. It is reasonably possible that changes in estimates will occur in the near term.

### *Fair Value of Financial Instruments*

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants as of the measurement date. Applicable accounting guidance provides an established hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in valuing the asset or liability and are developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company’s assumptions about the factors that market participants would use in valuing the asset or liability. There are three levels of inputs that may be used to measure fair value:

Level 1 - Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Include other inputs that are directly or indirectly observable in the marketplace.

Level 3 - Unobservable inputs which are supported by little or no market activity.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Fair-value estimates discussed herein are based upon certain market assumptions and pertinent information available to management as of Inception. Fair values were assumed to approximate carrying values because of their short term in nature or they are payable on demand.

#### *Risks and Uncertainties*

The Company has a limited operating history. The Company's business and operations are sensitive to general business and economic conditions in the U.S. and worldwide along with local, state, and federal governmental policy decisions. A host of factors beyond the Company's control could cause fluctuations in these conditions. Adverse conditions may include: competitive technology, dependency on other technologies for operations, and the macro-economics of industries for which the company's depends on to generate affiliate and referral revenue. These adverse conditions could affect the Company's financial condition and the results of its operations.

An investment in the Company (also referred to as "we", "us", "our", or "Company") involves a high degree of risk and should only be considered by those who can afford the loss of their entire investment. Furthermore, the purchase of any shares of the common stock should only be undertaken by persons whose financial resources are sufficient to enable them to indefinitely retain an illiquid investment. Each investor in the Company should consider all of the information provided to such potential investor regarding the Company as well as the following risk factors, in addition to the other information listed in the Company's Form C. The following risk factors are not intended, and shall not be deemed to be, a complete description of the commercial and other risks inherent in the investment in the Company

#### *Cash and Cash Equivalents*

For purpose of the statement of cash flows, the Company considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents.

#### *Revenue Recognition*

The Company will recognize revenues from premium subscription and referral marketing transactions when (a) pervasive evidence that an agreement exists, (b) the product or service has been delivered, (c) the prices are fixed and determinable and not subject to refund or adjustment, and (d) collection of the amounts due are reasonably assured.

#### *Income Taxes*

The Company applies ASC 740 Income Taxes ("ASC 740"). Deferred income taxes are recognized for the tax consequences in future years of differences between the tax bases of assets and liabilities and their financial statement reported amounts at each period end, based on enacted tax laws and statutory tax rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. The provision for income taxes represents the tax expense for the period, if any and the change during the period in deferred tax assets and liabilities.

ASC 740 also provides criteria for the recognition, measurement, presentation and disclosure of uncertain tax positions. A tax benefit from an uncertain position is recognized only if it is "more likely than not" that the position is sustainable upon examination by the relevant taxing authority based on its technical merit.

### *Concentration of Credit Risk*

The Company maintains its cash with a major financial institution located in the United States of America, which it believes to be creditworthy. The Federal Deposit Insurance Corporation insures balances up to \$250,000. At times, the Company may maintain balances in excess of the federally insured limits.

### *Recent Accounting Pronouncements*

The FASB issues ASUs to amend the authoritative literature in ASC. There have been a number of ASUs to date, that amend the original text of ASC. Management believes that those issued to date either (i) provide supplemental guidance, (ii) are technical corrections, (iii) are not applicable to us or (iv) are not expected to have a significant impact our balance sheet.

## **NOTE 3 – COMMITMENTS AND CONTINGENCIES**

The Company is not currently involved with, and does not know of any pending or threatening litigation against the Company or its member.

## **NOTE 4 – STOCKHOLDERS' EQUITY**

### *Common Stock*

The amount of security authorized is 10,000,000 with a total of 7,721,879 outstanding.

### Voting Rights

1 vote per share

### Material Rights

The total amount outstanding (7,721,879) includes 224,356 shares to be issued pursuant to reserved but unissued stock options, and 775,644 shares to be issued pursuant to outstanding stock options.

### *SeedInvest Convertible Note*

The security will convert into Common stock and the terms of the SeedInvest Convertible Note are outlined below:

Amount outstanding: \$758,174.00

Maturity Date: June 14, 2021

Interest Rate: 6.0%

Discount Rate: 20.0%

Valuation Cap: \$3,000,000.00

Conversion Trigger: \$1,000,000 preferred stock round

### Material Rights

Conversion of the Crowd Note.

a. Qualified Equity Financing. Upon the occurrence of a Qualified Equity Financing the Crowd Note shall convert automatically, without any further action on the part of either the Company or the Investor, whereupon the Crowd Note shall be deemed canceled, into the number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price prior to the closing of the Qualified Equity Financing.

b. Corporate Transaction. In the event of a Corporate Transaction prior to a Qualified Equity Financing, the Company shall notify the Investor in writing of the terms of the Corporate Transaction and the Investor shall receive the higher value received by either:

i. Obtaining that number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price; or

ii. Obtaining the Corporate Transaction Payment.

c. At or After Maturity. Commencing on the Maturity Date, the Crowd Note holders (by a decision of those Crowd Note holders holding a majority of the principal amount of the outstanding Crowd Notes) have the option to (a) require the Company to pay the Outstanding Loan Balances or (b) convert the Crowd Notes into a number of Conversion Shares equal to the quotient obtained by dividing the Outstanding Loan Balance by the Conversion Price. Upon the conversion of this Note into Conversion Shares, in lieu of any fractional shares to which the Holder would otherwise be entitled, the Company must pay the Holder cash equal to such fraction multiplied by such price per share.

d. Mechanics of Conversion. As promptly as practicable after the conversion of this Crowd Note, the Company at its expense will issue and deliver to the Investor, upon surrender of this Crowd Note, the respective number of Conversion Shares.

e. Note Completion. This Crowd Note will terminate upon the earlier of: (a) a conversion of the entire Purchase Price under this Crowd Note into Conversion Shares; or (b) the payment of amounts due to the Investor pursuant to Section 4(b)(ii).
