Lettuce Grow
Chief Executive Officer
May 2017 - Present (9 years)

Lettuce Grow is on a mission to change the food system by empowering everyone to grow 20% of their own food at home. Our goal is to build an expanding community of passionate growers deeply connected through good food and sustainable living. More and more people want to grow their own food, but the lack of space, time and horticultural knowledge keeps many from making it a reality, so we founded Lettuce Grow to help overcome those obstacles.

Founded with the mission to reconnect people with their food. We want to make it easy for everyone to grow food themselves and connect directly with farmers in their communities. We aim to empower people to ask the right questions – because when we ask the right questions, we can make informed choices and vote with our dollars for a better food system.
